The AQIS'13 conference will focus on quantum information processing, communication and cryptography, an interdisciplinary field bridging quantum physics, computer science, mathematics, and information technologies.

AQIS'13 will be a natural successor of EQIS'01 – EQIS'05 and AQIS'06 – AQIS'12; it will consist of invited talks, selected oral and poster presentations, as well as other activities.

Contributions are solicited in the following areas (but not limited to):

- Quantum computation, algorithms and complexity
- Quantum information theory
- Quantum decoherence fighting concepts, methods and tools
- Quantum cryptography
- Quantum communications experiments and theory
- Quantum technologies (optics, NMR, solid-state, ...)
- Quantum processor and computer design
- Quantum programming languages and semantics
